

Secure interview task submission with control, visibility, and protection

The Problem

Candidates invest hours into interview tasks including strategies, audits, designs, and code. Once submitted, this work is typically shared as an open file with no control or visibility.

The Solution

TaskLock replaces attachments with secure viewing links, allowing candidates to control access, track engagement, and reduce the risk of unauthorised reuse.

Key Benefits

- Controlled document access
- Named recipient sharing
- Expiry and revocation controls
- Viewing and activity tracking

How It Works

1. Upload your task as a PDF
2. Generate a secure viewing link
3. Share with an employer
4. Track access and activity

Simple Pricing

£2.50 per document. No subscription.
